SAADURYA K V

Chennai, Tamil Nadu — +91 9025146944 — saadumukil1426@gmail.com — LinkedIn

PROFILE SUMMARY

4+ years of experience across IT and startups, with hands-on experience in project management, cross-functional coordination, client management, process improvement, and technology-driven workflows. Worked closely with development, design, strategy, and content teams across web, app, and digital projects. Experienced in using AI and automation tools to simplify workflows and improve execution. Currently pursuing a Product Management program to build expertise in product discovery, strategy, and product development.

EXPERIENCE

Freelance Project Manager — Nuvant Content Hub Chennai — Jan 2026 – Present

- Managed end-to-end client projects, acting as the primary point of contact and coordinating with editing, design, and strategy teams to ensure smooth and timely execution.
- Supported business development through sales calls, client communication, and project onboarding.
- Took on broader execution responsibilities across the company, including creating UGC and content for official social media channels and supporting day-to-day content operations.

Project Manager — The GOAT Media Chennai — Apr 2024 – Dec 2025

- Handled 30+ personal branding projects end-to-end, serving as the main client contact and coordinating across editing, design, and strategy teams to ensure smooth and on-time delivery.
- Led a 6-member team, including task allocation, proactively flagging delays, resolving blockers, and maintaining systems, documentation, reports, and feedback loops.
- Built workflows using Zapier to scrape and organize content, improving work efficiency for social media managers.
- Developed custom ChatGPT tools and task automations to reduce manual work for project managers, enhance efficiency, and support content teams.
- Created unified shoot-blocking systems for cross-team collaboration, resulting in a 15% faster TAT.

Project Manager & Team Lead — Muskytten Technology Pvt Ltd Puducherry — Sep 2023 – Feb 2024

- Worked with development and design teams for multiple web and app projects, including OTT, dating, and e-commerce projects.
- Designed recruitment processes, curated technical assessments, and improved hiring alignment with project requirements. Strengthened collaboration between developers, designers, and management to achieve faster delivery cycles.

Offshore Associate – GET, Oracle DBA — HCLTech Chennai — Jan 2022 – Sep 2023

- Supported backend database operations and system stability for enterprise Oracle environments. Collaborated with onshore teams to monitor performance, manage escalations, and ensure seamless delivery.
- Gained foundational exposure to backend data systems, database logic, and large-scale IT project operations (Chubb Steady State, Lantmännen).
